PROFILE

BS Data Science student at UET Lahore with practical experience across the full development stack — from HTML/CSS front-ends and WordPress sites to Laravel v11 back-end systems, React Native mobile apps, and Python-based applications with OOP and database integration. Delivered multiple real-world projects and led technical workshops. Eager to contribute to a professional team and continue growing as a developer.

EDUCATION

BS Data Science

University of Engineering and Technology (UET), Lahore | 2025 – Present

- Currently enrolled in a 4-year undergraduate program focused on data science, programming, and applied computing.

Intermediate (Pre-Engineering / ICS)

Punjab Group of Colleges (PGC), Lahore | Completed 2024

- Completed intermediate studies with a foundation in mathematics, computing, and sciences.

TECHNICAL SKILLS

Languages: HTML5, CSS3, JavaScript, Python, PHP, MySQL

Frameworks: Laravel v11 (Back-End), React Native CLI (Mobile — In Progress)

CMS & Design: WordPress (Full-Stack), Canva, Power BI

Python Development: OOP, Database Integration, CLI Applications

Concepts: UI/UX Design, Responsive Web Design, MVC Architecture, REST APIs

Version Control: Git / GitHub

EXPERIENCE & PROJECTS

The Gadgetz Hub — Full-Stack Website (WordPress)

Freelance / Personal Project | 2024

- Built a complete full-stack tech gadgets website using WordPress — handled both front-end design and back-end configuration including plugins, product pages, and site settings.
- Implemented responsive layouts, product listing pages, UI design, navigation, and basic SEO setup.
- Managed hosting, deployment, and ongoing maintenance of the live site.

The Gadgetz Hub — Front-End Rebuild (HTML & CSS Only)

Personal Project | 2024

- Re-built the Gadgetz Hub website from scratch using pure HTML5 and CSS3 — no frameworks or CMS.
- Focused on pixel-accurate layouts, custom styling, and responsive design without any third-party dependencies.
- Demonstrates deep understanding of core web fundamentals independent of WordPress.

Project Management System — Python (OOP + Database)

Academic / Personal Project | 2024–2025

- Designed and built a full project management system in Python using Object-Oriented Programming principles.
- Integrated a MySQL/SQLite database for persistent storage of projects, tasks, and users.
- Implemented features including task assignment, status tracking, and user role management via CLI.

Career Path Advisor — Python Application

Personal Project | 2025

- Developed a Python-based CLI application that guides users toward suitable career paths based on their skills and interests.
- Used logic trees, conditional flows, and data structures to simulate an intelligent recommendation engine.
- Demonstrates applied Python skills including functions, file I/O, and structured program design.

Laravel v11 — Back-End Development

Personal / Academic Projects | 2025 – Present

- Actively building web applications using Laravel v11 — working with routing, controllers, Eloquent ORM, and Blade templates.
- Developing RESTful APIs and applying MVC architecture for clean, scalable back-end logic.
- Comfortable with migrations, seeders, middleware, and authentication scaffolding.

React Native CLI — Mobile App Development

In Progress | 2025 – Present

- Currently learning and building mobile applications using React Native CLI.
- Working with components, navigation, state management, and native device APIs.
- Focused on cross-platform (Android/iOS) app development as a growing skill.

Web Development Workshop Organizer

UET Lahore — Student-Led Initiative | 2024–2025

- Planned and conducted hands-on web development workshops for junior students at UET Lahore.
- Covered Wordpress Development in detail; prepared course material and exercises.
- Received a formal certificate of recognition for leading these workshops.

ACHIEVEMENTS & CERTIFICATIONS

-
- Certificate for Conducting Web Development Workshops — issued by IDS UET Lahore for organizing and leading technical workshops for junior students.
 - Delivered two versions of The Gadgetz Hub website — one full-stack WordPress build and one pure HTML/CSS front-end rebuild.
 - Built a fully functional Project Management System in Python using OOP and database integration.
 - Developed a Career Path Advisor application in Python — a complete standalone CLI program.
 - Currently developing with Laravel v11 and React Native CLI — actively expanding into full-stack and mobile development.

LANGUAGES

-
- English — Professional working proficiency
 - Urdu — Native / Full professional proficiency
